EDUCATION

Vellore Institute of Technology **2023 – 2027**

B.Tech in Computer Science and Engineering – ***CGPA: 8.25/10*** *Bhopal, India*

TECHNICAL SKILLS

Languages: C++, Java, Python, SQL, JavaScript, HTML5, CSS3
Frontend & UI: React.js, Next.js, Tailwind CSS, Redux Toolkit, React Query
Backend & Database: Node.js, Express.js, RESTful APIs, MongoDB, PostgreSQL, JWT
Tools & Infrastructure: Git, GitHub, VS Code, Linux, AWS (EC2, S3), Postman, Docker
Core Concepts: Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Advanced Software Engineering and Dev Intern **View Certificate**

MP Online *May 2026 – July 2026 | Bhopal, India*

- Engineered backend microservices and RESTful API endpoints using **Node.js**, **Express.js**, and **PostgreSQL** for citizen-facing digital governance portals.
- Optimized database queries with parameterized SQL and indexing, reducing endpoint latency by **25%** during peak request volumes.
- Implemented role-based middleware authentication and strict schema validation to mitigate injection vulnerabilities and secure service transactions.

PROJECTS

Ventora – High-Concurrency Event Booking Platform | **GitHub** | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS* **2026**

- Architected a full-stack booking system with **MongoDB multi-document ACID transactions** to eliminate seat-locking race conditions during simultaneous user checkouts.
- Implemented dual-layer authentication utilizing **JWT (HttpOnly access/refresh tokens)** paired with **OTP verification** and Role-Based Access Control (RBAC).
- Developed administrative analytics with **MongoDB aggregation pipelines** for real-time ticket inventory telemetry and revenue reporting.
- Designed a mobile-first, responsive interface via **Tailwind CSS**, optimizing asset delivery to achieve sub-second initial load times.

Snippet Master – Developer Code Management Engine | *React.js, Node.js, Express.js, MongoDB, Prism.js* **2026**

- Built a developer utility platform enabling syntax highlighting, markdown rendering, and granular public/private access controls for code repositories.
- Implemented **MongoDB compound text indexing** and client-side **debounced search**, reducing query overhead by **40%** across code libraries.
- Configured backend security controls including **rate-limiting (express-rate-limit)**, CORS policies, and NoSQL sanitizers against malicious payloads.
- Integrated state management and server-state caching using **TanStack Query**, eliminating redundant network round-trips for cached snippets.

ACHIEVEMENTS & CODING PROFILES

- Solved **200+ Data Structures and Algorithms problems** on LeetCode covering dynamic programming, graph theory, trees, and backtracking.
- Active participant in weekly global competitive programming contests on **LeetCode** and **Codeforces**, demonstrating strong algorithmic problem-solving.

CERTIFICATIONS

- **Google IT Support Professional Certificate** – Coursera
- **AWS Cloud Technical Essentials** – AWS / Coursera
- **The Bits and Bytes of Computer Networking** – Google / Coursera
- **Cisco Networking Basics** – Cisco Networking Academy
